

2nd Informal Meeting on Strings and QCD

with a focus on

Heavy Ion Collisions

Universitat de Barcelona
May 5-6 2009

Participants include

Javier Albacete, Jose L.F. Barbon, Jorge Casalderey-Solana, David d'Enterria, Matthias Kaminski, Karl Landsteiner, Volodymyr Magas, Crisitina Manuel, David Mateos, Guy Moore, Angel Paredes, Alex Pomarol, Agustin Sabio Vera, Carlos Salgado, Jonathan Shock, Javier Tarrío, and Miguel Angel Vazquez-Mozo.

Talks will take place in "Aula Pere Pascual", Facultat de Física, 5th floor

V. Magas, *Highlights from Quark Matter 2009*

D. d'Enterria, *Viscosity-over-entropy ratio: Latest heavy-ion data vs. AdS/CFT*

J. Casalderey, *Recent results on applications of AdS/CFT to HIC: A HIC perspective*

K. Landsteiner, *Recent results on applications of AdS/CFT to HIC: An AdS/CFT perspective*

G. Moore, *2nd order hydrodynamic coefficients: Weak vs. strong coupling*

J. Barbon, *Status of the AdS/CondMatt correspondence*

A. Sabio, *QCD saturation vs. BH formation (I)*

M. Vazquez, *QCD saturation vs. BH formation (II)*

Schedule

Speakers will prepare their talks for half the time allocated to them. The rest is to account for questions and discussion during or at the end of the talk.

Tuesday May 5		Wednesday May 6	
9:30 - 10:55	Magas	9:30 - 10:55	Moore
11:25 - 12:50	d'Enterria	11:25 - 12:50	Barbon
14:30 - 15:55	Casalderey	14:30 - 15:30	Sabio
16:25 - 17:50	Landsteiner	16:00 - 17:00	Vazquez
